Docket No. 1349.1310 S/N 10/712,319

AMENDMENTS TO THE SPECIFICATION

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with strikethrough.

Please REPLACE paragraph [0014] with the following amended paragraph [0014]:

[0014] The heat exchanger 30 is provided with a coil tube 31 formed in a spiral shape to increase the moving time of the air, and a cooling fan 32 exchanging heat by blowing air to an outer surface of the coil tube 2131 to cool the coil tube 2131.

Please REPLACE paragraph [0019] with the following amended paragraph [0019]:

[0019] To decrease the heating temperature of the heater 21, as shown in FIG. 3, there has been proposed a gas exhausting apparatus 10" in which a platinum catalyst 22 is disposed around a heater 21 of a combustor 20' to promote oxidation of a hydrocarbon gas generated by printer 1".

Please REPLACE paragraph [0046] with the following amended paragraph [0046]:

[0046] The heater-combustion part 132 is formed in a zigzag shape to maximize the surface area coming into contact with the hydrocarbon gas, and to thereby improve the transfer of heat thereto, and has a heating temperature of 150-400 °C.
